EDUCATION

Bennett University, Bachelor of Technology in Computer Science (AI Specialization) 2022 – 2026
CGPA: 8.45/10 (GPA: 3.38/4.0)

EXPERIENCE

Neurabit Solution LLP Aug 2025 – Present
GenAI Intern — Remote

- Engineered core AI chat feature of **NowoChat (@NowoAI)** application using **Google ADK**, **SQLAlchemy**, and **LLM function calling**.
- Designed scalable conversation workflows enabling structured tool invocation and intelligent response orchestration.

Cloudcredits Apr 2025 – May 2025
ML Intern — Remote

- Implemented **Byte Pair Encoding (BPE)** tokenizer, improving vocabulary control and model efficiency.
- Enhanced text preprocessing pipeline, improving training throughput by **12%**.

PROJECTS

MLOps Pipeline Distribution (DVC)
Tech: DVC | DVCLive | Python | Scikit-Learn

- Built a scalable end-to-end ML pipeline with stages for ingestion, preprocessing, TF-IDF, and Random Forest training.
- Automated reproducibility with **DVCLive** and parameter tracking, improving experiment management by **40%**.

ConvoLens — Conversation Insight Platform
Tech: Flask | FAISS | Docker | Google Cloud Run

- Developed a cloud-native service integrating **LLMs + FAISS vector search**, converting unstructured audio into searchable insights.
- Deployed on **Google Cloud Run** for elastic scaling and low-latency query performance.

GigChatBot — Multilingual RAG Assistant for Blue & Gray Collar Workers  gigtap.in
Tech: FastAPI | LangChain | Gemini | RAGAS

- Built a production-grade **RAG-based multilingual chatbot** deployed live on the Gigtap platform.
- Implemented **Guardrails** for response safety and **RAGAS** for automated evaluation of retrieval and generation quality.
- Designed context-aware retrieval pipelines improving factual consistency and multilingual accessibility.

BlogWeaver — Multi-Agent Blog Generation System
Tech: LangGraph | LangChain | LangSmith

- Built a **LangGraph-based multi-agent workflow** capable of reasoning, planning, and generating complete blog pages with contextual images.
- Integrated agent collaboration for outlining, drafting, critique, and refinement stages.
- Used **LangSmith** for observability, tracing, and debugging multi-agent execution paths.

Synapse — Universal AI Memory Extension
Tech: Chrome Extension | JavaScript | WebAssembly | On-device ML

- Built a privacy-first Chrome extension that unifies conversational history and documents across major LLM assistants.
- Created a unified intelligent memory layer organizing user preferences, files, and conversations automatically.

SKILLS

Programming Languages: Python, C++, SQL

Databases: SQLite, Neo4j (**Knowledge Graphs**)

AI & Machine Learning: Supervised, Unsupervised, Reinforcement Learning; Deep Learning (**CNN**, **LSTM**, **Transformers**); NLP (**BPE Tokenizer**, **Embeddings**); Computer Vision (**OpenCV**); **GenAI**, **PINNs**, AutoML
Hyperparameter & Experiment Tracking: **Optuna**, **Weights & Biases (W&B)**

Data Science & Analytics: Data Preprocessing, Feature Engineering, Statistical Analysis, Hypothesis Testing

Frameworks & Libraries: TensorFlow, PyTorch, Keras, Scikit-Learn, Hugging Face, OpenAI API, LangChain, LangGraph

Cloud: **AWS-S3**, Cloudinary

Deployment & APIs: **Flask**, **FastAPI**, **Render**

Soft Skills: Team Collaboration, Communication, Problem-Solving

CERTIFICATIONS

Coursera: Supervised Learning, Unsupervised Learning, EDA, Neural Networks and Deep Learning (Andrew Ng),
Network Fundamentals
